There are risks associated with investing including possible loss of principal. Foreign investing involves special risks of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effect of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, offshore or frontier markets are generally less liquid and more volatile than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and international developments.

Investments in emerging, offshore or frontier markets are generally less liquid and more volatile than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and international developments.
