In addition, Chinese domestic listed companies that are part of the connect program and meet index requirements will be selected</p> <p>Companies within the bottom decile of the starting universe on a composite risk factor score, which is composed of an equally weighted score of the below two factors, are not eligible for inclusion</p> <p>1) Quality Factor- determined by static observations and trends of return on equity (ROE), return on assets (ROA), gross profits over assets and cash flows over assets.</p> <p>2) Momentum Factor- determined by stocks' risk adjusted total returns over historical periods</p> <p>•Companies need to have a median daily dollar volume of at least \$1,000,000 for each of the three months preceding the Screening Date</p>	Battery Chain and Innovation Fund (WBAT)

<sup>9</sup> Companies are assigned a Weight Factor based on their Focus and Growth Scores:

•1.33 for companies with scores of "Broad Focus" and "Growing Fast"

•0.75 for companies with "Narrow Focus" and "Growing"

•1 for all other companies

Companies are weighted to reflect their proportionate share of the Weighting Factor; subject to the following "5/37.5 rule" and liquidity adjustment:

5%/37.5% rule - the collective weights of companies with over 5% weight is capped at 37.5% at the index rebalance.

<sup>10</sup> The Index classifies the BESS value chain into 4 categories (i.e., Raw Materials, Manufacturing, Enablers and/or Emerging Technology) (collectively, "Battery Value Chain Activities"), partitioned into 12 sectors, which are further divided into 37 sub-sectors.

**Raw Materials** - companies that focus on raw battery materials mining, such as Lithium, Nickel or extract chemicals for instance Lithium Carbonate, Cobalt Chemicals specifically used for BESS.

**Manufacturing** - companies that process battery materials, cell, pack and build components such as Anode, Cathode for BESS.

**Enablers** - companies that develop the battery building block components for BESS such as grid edge or charging infrastructure.

**Emerging Technologies** - companies that use new battery storage technologies such as Lithium Air, Hydrogen Fuel Cell or develop new applications for instance wireless charging.

**Dividend Indexes** - Indexes will apply a Dividend Stream® adjustment for constituents with dividend yields greater than 12% at the screening date. The Dividend Stream of these capped securities will be their market cap multiplied by 12%.

Gross cash dividends are base ( Mts ate

There are risks associated with investing, including possible loss of principal. Foreign investing involves special risks, such as risk of loss from currency fluctuation or political or economic uncertainty. Investments in real estate involve additional special risks, such as credit risk, interest rate fluctuations and the effects of varied economic conditions. Funds that focus their investments in one country or region may be significantly impacted by events and developments associated with the region, which can adversely affect performance. Funds focusing on a single sector and/or smaller companies generally experience greater price volatility. Investments in emerging, off-shore or frontier markets are generally less liquid and less efficient than investments in developed markets and are subject to additional risks, such as risks of adverse governmental regulation and intervention or political developments. Due to the investment strategy of certain Funds, they may make higher capital gain distributions than other ETFs. Please read the Funds prospectus for specific details regarding the Funds risk profile.
